

Mr Fred Nato, Robotics Industry Manager.

Biography:

Fred Noto is a Robotics Industry Manager at MathWorks Japan where he works with robotics and autonomous systems customers to realize solutions for complex and advanced robotics systems development.

Fred joined MathWorks in 2012 as an application engineer for control systems design, where he interacted with a wide range of customers to assist with adoption of model-based design, as well as ensure rigorous verification and validation needs were met. He transitioned to his current role in 2018, and has been steadily working with robotics customers to ensure their needs are met by MathWorks solutions.

Prior to joining MathWorks, Fred worked at Northrop Grumman in Los Angeles, and as a Guidance, Navigation & Controls Engineer, he gained experience working on autonomous algorithms and controls systems for ground and aerial autonomous systems. Fred holds a bachelor's degree from the University of California, Los Angeles, and a master's degree with the University of Southern California, both in Aerospace Engineering.

Northrop Grumman Corporation is an American global aerospace and defense technology company.
